### **How to keep your guns safe at home:**

When you get your firearms home, it is important to keep your firearms safe, in a place that is easy for you to get to if you need it and is only accessible by you. There are many ways to keep your firearms safe, including: Safes, gun cabinets and lockboxes. Safes are the ultimate form of protection for multiple firearms. Safes are the greatest deterrent to theft due to their size and weight, and offer fire protection. Cabinets offer storage for multiple firearms, but feature lighter metal construction than safes and are locked by key rather than combination lock. Gunboxes are small boxes, usually for one or two firearms that offer more protection than your standard gun case, and can be found with key locks, combination locks or biometric entry locks. Other ways to secure your firearms are with

NJSP page covering transporting a firearm into and through the state.

2. <https://www.usconcealedcarry.com/blog/new-jersey-gun-laws-what-you-need-to-know/>

Helpful blog regarding laws new owners in NJ should know.

## **Traveling with your firearm:**

According to the NJSP all firearms should be unloaded during transportation. The firearm should be contained in a closed and fastened case, a securely tied package or locked in the trunk of the automobile. In the course of travel, only reasonably necessary deviations are allowed.

## **What to do with your firearms and ammo:**

All firearms should not be directly accessible from the passenger compartment of your vehicle. If the vehicle does not have a compartment separate from the passenger compartment the firearm(s) and ammunition must be in a locked container other than the glove compartment or console.

## **Reasonably Necessary Deviations:**

NJ law allows a limited amount of deviation in the course of travel while lawfully transporting a firearm. You may transport firearms while following the guidelines we covered earlier: To and from your home, business, hunting, shooting ranges and while moving between residences. NJ law allows, but doesn't clearly define what reasonable deviations are. Under Governor Chris Christie, the State Attorney General issued a directive to provide guidance on what reasonable deviation is. While not an exclusive list, some examples laid out by the State AG are; Collecting and discharging passengers, purchasing food, fuel and beverages, medication or other needed supplies, using a restroom, contending with an emergency situation or driving around a traffic jam.
